

Working together for our region's people, economies and environment

We live in an area rich with breathtaking lakes and rolling hills. Delavan Lake is an integral part of our community's identity and it drives our economy. Pollution is entering our lake from many sources. Over time, this pollution builds up and seriously threatens the health and vitality of Delavan Lake as a recreational resource and regional destination.

Our jobs, property values and economic stability depend on a healthy lake. It is going to take a region-wide cooperative effort to protect our lake. **Delavan Lake WIN**, a diverse network of committed organizations, has been formed to solve the problems facing our lake.

Delavan Lake WIN is a growing collaboration of organizations dedicated to protecting our lake. While each of these groups are already achieving great work to protect the Lake, **Delavan Lake WIN** is necessary and important as a way to connect, enhance and do more for the lake than any one group or leader can do on its own. **Delavan Lake WIN** considers all aspects of the region's needs and habitats to attain healthy and sustainable water quality that meets the needs of the surrounding human and ecological community.

Benefits of Delavan Lake WIN

Our region is blessed with responsible community leaders, local officials, county, state and federal employees and dedicated volunteer and environmental organizations. But these individuals and organizations cannot protect our lake alone. Only a diverse, engaged and active coalition that shares resources, ideas, expertise and connections can make the difference. **Delavan Lake WIN** members all contribute unique skills and resources that make the network strong and effective.

Together, these members have created a network that increases each member's capacity and individual effectiveness.

With the combined efforts of an active network like Delavan Lake Win, we can achieve greater improvements and protections for our region's people, economies and environment.

Delavan Lake WIN, a funded Network, is managed by the Kettle Moraine Land Trust (KMLT). Maggie Zoellner, the KMLT Program Manager, acts as the Network manager and facilitator.

Delavan Lake WIN Invited Members

- City of Delavan
- City of Elkhorn
- Delavan Lake Improvement Association
- Delavan Lake Sanitary District
- Farm Service Agency
- Kettle Moraine Land Trust
- Natural Resources Conservation Service
